

August 4, 1944

Mr. J. T. Leigh,  
Water Commissioner  
Coal Creek System  
Cedar City, Utah

Dear Sir:

Re: COAL CREEK DISTRIBUTION,  
ANNUAL REPORT

This office is in continual need of information collected by the various Water Commissioners. It is requested, therefore, that you incorporate in your next annual report, being the one for 1944, any information you may be able to collect concerning irrigation company organization; efficiency in water distribution; suggested improvement in any of the systems; needed water storage; any comments or information you may have on diversion and conveyance facilities, and any possible sources of new water supply, as well as the area under irrigation served by the various canals or diversions from the stream.

This will have the effect of contributing valuable data for the advancement of irrigation affairs in your locality. In this matter, it is suggested that you work in harmony and cooperation with the County Agricultural agent or agents.

Yours very truly,

Ed. H. Watson  
STATE ENGINEER
